Teaching:

Traditional Courses:

Instructor of Record (Summer 2014)

Description: SOC-167, Sociology of Social Media and Virtual Communities, a 35 person upper-division undergraduate course. Duties included: All duties as instructor of record, including designing an entirely new syllabus with lectures and assignments, as well as supervising one teaching assistant who assisted with grading and logistics.

Adjunct Instructor (Spring 2014)

Description: SOC-167, Sociology of Social Media and Virtual Communities, a 250 person upper-division undergraduate course. Duties included: Taking over the first 1/3rd of the entire class after the instructor resigned one week before the beginning of the semester. With two other adjunct instructors, we designed a new syllabus, assignments, and exams, held office hours, gave 3 hours of lecture per week, and supervised a team of teaching assistants.

Graduate Student Instructor (Spring 2014)

Description: INFO-103, History of Information, a 60 student undergrad course. Duties included: Grading assignments; holding weekly office hours; assisting students with writing and final projects; giving two 1.5 hour lectures per semester. Reference: Paul Duguid

Graduate Student Instructor (Spring 2012, Spring 2013)

Description: INFO-203, Social Aspects of Information, a 60 student masters-level course. Duties included: Grading assignments; holding weekly office hours; assisting students with writing and final projects; giving two 1.5 hour lectures per semester. Reference: Jenna Burrell

Teaching assistant (Fall 2009)

Description: CCTP-783, Qualitative Data Analysis, a core methods graduate-level course. Duties included: General logistical work to prepare for classes; working as needed with individual students to develop research agendas, theoretical orientations, and multiple qualitative data analysis techniques. Reference: David Ribes

Teaching assistant (Fall 2008)

Description: CCTP-505, Introduction to Communication, Culture, and Technology, a required course for first-year graduate students. Duties included: Holding weekly discussion sessions with an eleven student group to discuss course material and

assignments, holding regular office hours, and providing technical support to professors during lectures. Reference: Jeanine Turner and Michael Coventry

Non-traditional courses:

Undergraduate Research Apprenticeship Mentor (Fall 2018, Spring 2019)

Description: An instructor/mentor for UC-Berkeley's Undergraduate Research Apprenticeship Program (URAP), in which students assist with research activities for course credit. For the 2018-9 academic year, I have led a team of five students on a meta-research project about the quality of training data for machine learning, which includes weekly meetings and one-on-one interaction as necessary.

Software and Data Carpentry Instructor (since May 2016)

Description: Software and Data Carpentry is an international non-profit organization that teaches computing and data science skills to researchers in short, no-cost workshops (2-5 days). Becoming a certified software carpentry instructor involved taking a programming-focused pedagogy course, assisting a veteran instructor with running a workshop, then passing a teaching evaluation in a live classroom setting.

Peer learning group coordinator (Fall 2016, Spring 2017, Fall 2017)

Description: Since Fall 2016, I have led *The Hacker Within*, a peer learning group run out of the Berkeley Institute for Data Science, where learners meet 1.5-2 hours a week to teach each other a new language, library, platform, concept, or other topic related to data science and scientific computing. Duties included: Developing the weekly schedule, finding experts to lead each week's session, consulting with session leaders to develop lessons, maintaining computational infrastructure for the group, and outreach to campus and community.
